

FieldBASIC CONTROL PANEL

Field Management Products

FieldBASIC

Hands-on Irrigation Control

Easy, hands-on pivot control is yours with the FieldBASIC panel. Its innovative design provides reliability that has been proven under the toughest operating conditions. Plus, easy-to-understand icons simplify operation.

Hour meter

Lighted LED system indicators guide you through start-up and provide instant information on irrigation system status

Voltage monitoring

Pump and direction controls make it simple to start, change direction and turn the water on or off

Solid State Percentage indicator determines speed and amount of water applied

| <input type="checkbox"/> Automatic reverse | <input type="checkbox"/> Accessory interface |
| <input type="checkbox"/> Automatic power restart | <input type="checkbox"/> AG 3000 flow sensor/totalizer |

GrowSmart is Technology that Thinks Like You

Introducing the FieldBASIC Control Panel

Conserving water, energy and labor is easier than ever before with new GrowSmart™ technology and the FieldBASIC control panel. It sets the standard for manual operation.

The FieldBASIC control panel can improve your field management with the following advantages:

Friendly Irrigation Control

- Designed to be simple and intuitive, we've used easy-to-understand icons on the control panel
- Lighted LEDs provide visual feedback of system status

Versatile Irrigation Management

- The FieldBASIC can be remotely controlled by adding the GrowSmart Voice Command option
- Add an accessory interface to control optional chemigation or fertigation systems

Powerful Resource Management

- New solid-state percent timer provides greater accuracy at high and low application rates so the right amount of water is applied
- Add a flow meter to enhance management capabilities or ensure regulatory compliance

Future Expandability

- Modular design for future upgrades
- GrowSmart technology can grow and change with your needs, making irrigation planning as basic or sophisticated as you want it

The FieldBASIC Gives You More Benefits

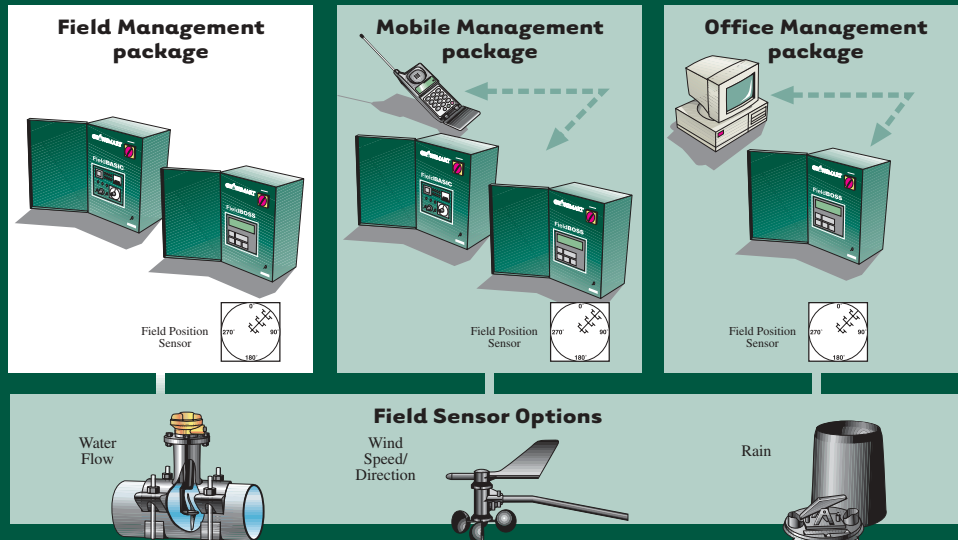

SIMPLE OPERATION

- Reliable design with positive toggle and rotary switch controls
- Simply dial in your speed

UPGRADABLE

- The modular design allows you to upgrade to other GrowSmart control products to meet future needs

GrowSmart Control Products

Expand your Irrigation System Control

GrowSmart™ irrigation products are compatible with most mechanical-move irrigation systems and available at both Greenfield and Zimmatic irrigation dealers.

The Company that's Making It Happen

Lindsay is a leading manufacturer and marketer of center pivot and lateral move irrigation equipment under the Zimmatic, Greenfield and GrowSmart brand names. The company also produces large-diameter steel tubing and provides outsource manufacturing and production services for others.
